### Sea of Japan

When in the Russo-Japanese War, the Russian government ordered the ~~Battle~~ fleet <sup>BALTIC</sup> to Japan, the Japanese allowed the vessels free passage until they reached the Sea of Japan. There the Japanese fleet formed a circle around the hapless armada, and fought the greatest of Japan's naval battles. The struggle did not cease until the Russian

that was practically destroyed or captured  
Japan's losses were 3 torpedo boats, 116 men  
killed and 538 wounded. Russia  
lost her fleet of 38 vessels, 4000 men  
killed, and 7,300 taken prisoner.

Albert Einstein shattered our notions about time in 1905 with his theory of special relativity. The very measurement of time intervals, he declared, is affected by the motion of the observer.

Rapidly moving clocks tick more slowly than clocks at rest.

a clock around a rooming travelling  
at 87% the speed of light would tick  
at only half as fast as a clock  
on earth.

1905

At the speed of light a body would have zero length and infinite mass, while time would stand still on it
